OPERATOR'S MANUAL

Important Safety Instructions

Important Safety Instructions

WHEN USING YOUR APPLIANCE, BASIC PRE-CAUTIONS SHOULD ALWAYS BE FOLLOWED, INCLUDING THE FOLLOWING:

Read all instructions.

Use appliance only for its intended use.

To reduce the risk of electric shock, do not immerse the appliance in water or other liquids.

Never pull cord to disconnect from outlet, instead grasp plug and pull to disconnect.

Do not allow cord to touch hot surfaces, let appliance cool completely before putting away.

Do not operate appliance with a damaged cord, or if the appliance has been dropped or damaged. To reduce the risk of electric shock, do not disassemble or attempt to repair the appliance, take it to a qualified service person for examination and repair. Incorrect reassembly or repair could cause a risk of fire, electric shock, or injury to persons when the appliance is used.

Close supervision is necessary for any appliance being used by or near children. Do not leave appliance unattended while connected.

Burns could occur from touching hot metal parts.

To reduce the likelihood of circuit overload, do not operate another high voltage appliance on the same circuit.

If an extension cord is absolutely necessary, a 20 ampere rated cord should be used. Cords rated for less amperage may overheat, care should be taken to arrange the cord so that the cord cannot be pulled or tripped over.

SAVE THESE INSTRUCTIONS.

CONTROL PANEL

Soperating Instructions

The Digital Sprint® Mag Digital Operating Instructions are designed with you in mind. Carefully read and follow the step-by-step instructions for best results. If you experience any difficulty, carefully re-read the instructions and try again.

Pay particular attention to the risk of burns which can be sustained by touching the heated platen during use.

Keep hands clear from the platens of the press during platen lock down as the pressure can cause injury.

Press should be placed on a sturdy suitable stand of at least 60 x 90cms (24"x36").

Work area must be kept clean, tidy and free of obstructions to the movements of the heat press.

Power supply cord must be disconnected before cleaning or servicing press.

1. Connect the Power Cord

Connect the power cord into a properly grounded (earthed) electrical outlet with a sufficient amperage rating.

Your Sprint® Mag Digital requires a full 7,5 amp grounded circuit for 240 volt operation.

Extension Cords, if used, should be as short as possible and not less than 12 gauge. Heavy duty cords are recommended.

Circuits that have under 15 amps or other high demand equipment or appliances (especially more than one heat seal machine) should not be used.

NOTE:

If the supply cord is damaged, it must be replaced by the manufacturer or its service agent or a similarly qualified person in order to avoid hazard. Use HSJ type, rated 250V-10 AMP for replacement.

CAUTION

FAILURE TO FOLLOW THESE INSTRUCTIONS WILL CAUSE:

- 1. Erratic controller functions.
- 2. Inaccurate displays and slow heat-up.
- 3. The circuit breaker to disengage.

Operating Instructions

2. Turning the System On

See the diagram below for switch placement.

Locate the packaging bolt positioned on the top-centre of the press. Packaging bolt must be removed prior to turning the press on or operating the press.

NOTE:

The Sprint® Mag Digital is equipped with an Auto Sleep Mode. When the machine is not in use for a period of two hours, it will enter an energy saving sleep mode. To restore to normal operating mode, press any button on the display panel and allow the heat press to return to the target temperature

Adjust Temperature & Time

3. Adjusting the Temperature

- Locate the LED Display on the Press.
- Press the Mode Select button located in the centre of the Control Panel.
 The (SET) and (TEMP) lights located next to the display will illuminate indicating you are in the adjust temperature mode.
- Next, press the (-) button located to the left of the Mode Select button to lower the temperature setting, or press the (+) button located to the right of the Mode Select button to raise the temperature setting. The temperature can be set from 170° F (76° C) to 430° F (220° C).

The LED will display changes as you make them.

4. Adjust the Time

The Sprint® Mag Digital has two time settings. This will allow you to set different times when a two step application is required. For single hit applications, you simply set both time settings the same.

Once you have adjusted the temperature, press the Mode Select button again. This will advance you to the Time #1 mode. The set and time lights will illuminate, indicating that you are in the Time #1 mode.

Adjust the time in the same manner that you adjusted the temperature. Once you have the Time # 1 set, push the Mode Select button again to advance to the Time # 2 setting. All three red LED lights will illuminate indicating that you are in the Set Time # 2 Mode. Select the desired time and push the Mode Select button again to exit the time settings. All lights will be off and the press will return to the print mode.

NOTE:

Press the Mode Select button ONCE to advance to the Adjust Temperature Mode.

Remember:

- Press the Mode Select button A SECOND TIME to advance to the Time #1 mode
- Press the Mode Select button A THIRD TIME to advance to the Time #2 Settings.
- Press the Mode Select button A FOURTH TIME to return to the Heat Up/Operating Mode.

Adjusting the Pressure

5. Adjust the Pressure

First, locate the LED Display on the Press. (see figure 1).

The pressure adjustment knob is located in the centre of the heat heat platen (see figure 2).

Adjust the pressure by turning the knob clockwise to increase pressure and counter clockwise to decrease pressure.

PRESSURE READOUT

A visual Pressure Readout is located on the lower right side of the LED Display. When the handle is locked into the Print Position, a pressure number will be displayed. Readout will be on a scale of 0 - 9. A 0 Pressure readout would indicate no pressure at all and 9 would indicate very heavy pressure (see figure 1).

1 - 3 = light Pressure

4 - 7 = medium Pressure

8 - 9 = heavy Pressure

Visual Pressure Readout

To adjust the Pressure, simply turn the Pressure Adjustment Knob to the right or clockwise to increase the Pressure and to the left or counter clockwise to decrease the Pressure. The readout will display the Pressure when locked down in the print position.

Remember:

To allow for the thickness of your garment when adjusting the pressure.

WARNING:

Structural damage caused by excessive pressure is not covered under the limited warranty!

Parts Location Guide

Sprint® Mag Digital is available in three sizes: 28x38 cm, 40x40 cm, 40x50 cm

When ordering replacement parts, refer to the following color codes

For a 28x38 cm press - use colour code A

For a 40x40 cm press - use colour code B

For a 40x50 cm press - use colour code C

Electrical Schematic

EC conformance explanation:

For the purposes of the EC-Machine Guideline 98/37EU, Appendix 2A and the EC Low Voltage directive to 73/23 European Economic Community as well as the EC EMV-guideline 89/336. For the manufacturer STAHLS' Hotronix Division, we state as European Commissioners, that our product:

A Transfer Press for ironing of thermo application.

Model: Sprint® Mag Digital

The product supplied corresponds to the following appropriate regulations:

EMC Directive (2004/108/EC) & Low voltage Directive (2006/95/EC)

Applied Harmonized norms

EN 55011:2007 EN 61000-4-4:2004 EN 61000-3-2:2006 EN 61000-6-1:2007 EN 61000-4-5:2006 EN 61000-3-3:1995 EN 61000-4-2:1995 EN 61000-4-6:1996 EN 60335-4:2004 EN 61000-4-3:2006 EN 61000-4-11:2004 EN 60335-2-44:2003

IEC 61000-3-3:1994

CE

It is possible that not all the listed norms apply to the above mentioned product.

STAHLS' Europe GmbH

IEC 61000-3-2:2005

(Frank Brücker, Chief Executive STAHLS' Europe GmbH)

WEE and RoHS Symbols

STAHLS' Europe GmbH will take back ALL heat press machines

FREE OF CHARGE (inside the EU) that have been manufactured by them, even those sold prior to the date stated above, subject to the heat press machine being delivered to them at the owners costs.

STAHLS' Europe GmbH will break down the heat press machine and ensure that all recyclable parts are correctly recycled, and non-recyclable parts will be disposed of in accordance with legal requirements. In an effort to make such transaction as smooth to customers as is possible, and to ensure that all STAHLS' heat presses are identifiable, all heat press machines supplied by STAHLS' Europe GmbH will have the logo/brand of STAHLS' Hotronix clearly marked upon them.

Contact:

STAHLS' Europe GmbH, Dieselstraße 62, 66763 Dillingen, Germany Telefon: +49 (0) 68 31/97 33-0, Fax: +49 (0) 68 31/97 33 45, www.stahls.de, info@stahls.de

Terms of Guarantee

Warranty Policy

STAHLS' Europe GmbH provides the following warranty for the Sprint® Mag Digital, subject to the following terms:

Duration

The warranty period of 2 years commences from the date of receipt by the buyer of the heat press machine, which can be verified by the invoice or similar documents. The warranty does not cover any damage caused by normal wear and tear.

Repair

If any parts are found to be defective, despite proper use, authorised use and not as a result of fair wear and tear, within the warranty period, then they will be replaced or repaired without question provided that STAHLS' Europe GmbH have been informed of any such claim in writing within one week of the occurrence of the failure. The terms and conditions of the commercial transaction are specifically excluded from this warranty, especially §§377 et.seq. HGB. Following any claim under the warranty, the warranty period will not be extended for either the heat press machine or for any replaced parts. Any exchanged parts will be the property of STAHLS' Europe GmbH. No charge will be made for any labour or components for any claim under the warranty. STAHLS' Europe GmbH operates a "bring in" guarantee for the first six months from the date of the purchase, under which all delivery and return costs will be borne by STAHLS Europe GmbH. After the first six months from the date of purchase, all delivery and return costs will be borne by the customer.

Rectification

Initially the customer's rights are limited to repair by STAHLS' Europe GmbH. Should the repair or remedial works finally fail, it will become the customer's right according to §462 BGB to receive a payment reduction, or to withdraw from the contract. In every case, any further claim would be excluded, especially indemnity claims (including consequential damages) and those resulting from defects, unless it can be proven that STAHLS' Europe GmbH acted intentionally, grossly negligently, or there are requirements according to §463 BGB.

Returns

Goods may only be returned with express written authorisation from STAHLS' Europe GmbH. Customers must ensure that the heat transfer machine is properly fixed to the supplied wooden panel, and returned in the original carton, which must include the contact details of the sender, together with details of any failure which requires remedying. STAHLS' Europe GmbH will not be liable for any damages howsoever caused during transportation as a result of improper packaging.

Acceptance of Returned machines manufactured by STAHLS' for disposal

STAHLS Europe GmbH agrees to accept the return of all heat press machines manufactured by STAHLS' or with their genuine trademark for Free of Charge disposal, subject to the costs of delivery to STAHLS' Europe GmbH being borne by the sender. WEEE DE 54539730.

Packaging

The original carton (box), packaging and wooden transport panel must be retained for any future transportation of the heat press machine.

Circuit Breaker

If the circuit breaker should become dislodged, it can easily be reinstated after the heat press machine has cooled down. It is recommended to try and eliminate the source of any failure by using the error checklist.

Set Up

It is important that the heat press machine is fixed securely to your worktop. To set up the press, it is necessary to fully open the press, and place the substrate that is to be printed flat on the lower platen. If the press is not fully open, there is a risk of being burnt. Always follow the supplied instructions for printing for every respective material.
